

SMB1001:2026 - Email authentication is now mandatory

Your clients need DMARC sorted.

Suped + CyberCert gives MSPs a managed service practice, a certification pathway, and a client conversation that opens doors.

\$97k+ avg SME BEC loss per incident

ASD Cyber Threat Report 2024–25.

2 controls now mandatory

in SMB1001:2026.

1 dashboard to manage SPF, DKIM and DMARC

across every client you have.

Start Smart, Start Silver.

THE PROBLEM

Sound familiar?

“DMARC’s been at p=none for months. I know. I just don’t have a tool.”

1

Domain exposed

Attackers know p=none is an open invitation. Zero protection against spoofing or impersonation.

2

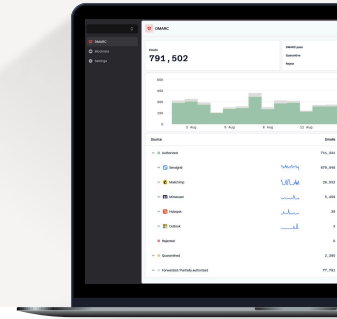

Insurer circling

Cyber renewal asks about DMARC. p=none is not a good answer — increasingly grounds for denial.

3

Now compulsory

SMB1001:2026 mandates SPF at Silver, DKIM+DMARC at Gold. Unresolved DMARC blocks certification.

THE CERTIFICATION PATHWAY

Two tiers. One platform. Done.

Silver

WHAT SMB1001:2026 REQUIRES

SPF on all sending domains — every service authorised to send email on behalf of the business.

WHAT SUPED DOES

- Instant SPF audit across every domain. Gaps surfaced on day one.
- Ongoing monitoring — alerts when records change or new senders appear.
- Automated white-label report confirms compliance, delivered monthly.

WHAT THE SMB ACHIEVES

Director-attested certification · Meets supply chain cyber baseline · Supports cyber insurance applications.

Gold

WHAT SMB1001:2026 REQUIRES

SPF + DKIM cryptographic signing + DMARC at p=quarantine or p=reject — full email authentication enforcement.

WHAT SUPED DOES

- Guided DMARC policy transition: p=none → p=quarantine → p=reject.
- Real-time report aggregation — reads the XML so the MSP doesn't have to.
- Policy drift alerts — flags new SPF gaps the moment they open.

WHAT THE SMB ACHIEVES

Director-attested certification · Compliance-ready posture · Minimum standard recommended by legal sector.

What Suped does for MSPs.

One dashboard, every client

No context switching. Spot issues across hundreds of clients instantly. No minimums, no lock-in.

Automated white-label reports

Monthly DMARC compliance reports, branded with your MSP identity, delivered automatically to every client.

SMB1001:2026 compliant out of the box

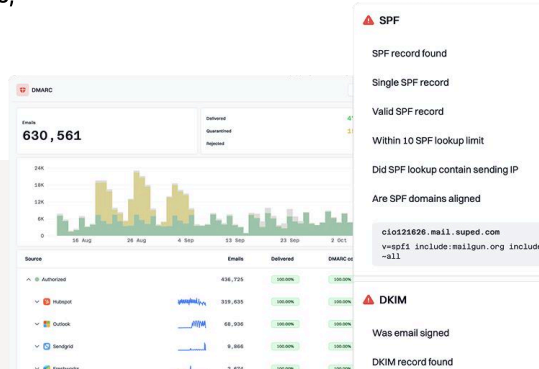

Satisfies controls 2.12.0.0 (Silver) and 2.12.1.0 (Gold). Every domain you manage is on a certification path.

THE BUSINESS CASE

DMARC isn't a project. It's a retainer.

- Cost** Per-domain, flexible pricing. No minimums. No lock-in.
- Your margin** Set your own rate. Margin is entirely yours to define.
- Time** ~20-30 min per month. Review dashboard, respond to alerts.
- Deliverable** Monthly white-label report + ongoing certification pathway.
- Renewal** Every Silver/Gold cert renews annually. Every renewal is a touchpoint.

Revenue compounds. As your client base grows, retainers stack — the admin doesn't, because Suped handles monitoring and reporting automatically.

Start Smart, Start Silver.

"Clean, concise and colour-coded dashboard with easy-to-use multi-tenant capabilities."

Ben Farmer · DigiBean MSP

"We've moved from reactive guesswork to proactive management."

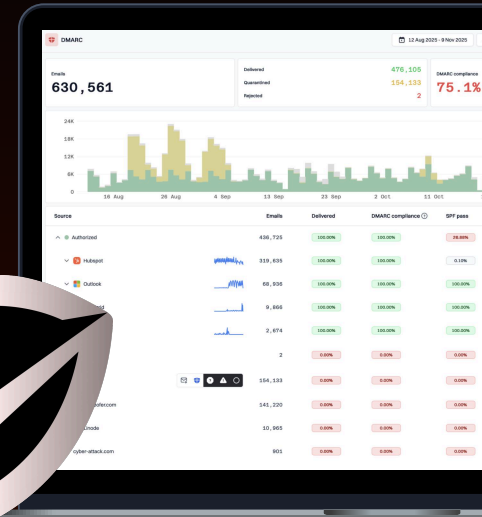

John Porteous · Alliance Group

"Suped gives us a platform that scales with our business... a reliable part of how we deliver our service."

Markus Hugenschmidt · Jam Cyber

Your first client domain is audit-ready in under 10 minutes.
